🖥 Technology: Data & Analytics

An industrial artificial intelligence software company built on a foundation of data science and machine learning.

CHALLENGES

This client faced the challenge of navigating through leadership changes and internal restructuring

Re-staffing and reorganizing its internal structure led them to transform from their early startup roots to a larger enterprise

GOAL

Rebuild and provide robust support for their data and analytics team

From Setback to Success:
LaSalle Rebuilds Data & Analytics Team in 27 Days

OUTCOME

In the area of Data & Analytics, we successfully placed 3 individuals, which subsequently opened doors to additional opportunities across various technology domains.

Over six months, we made 18 placements in diverse technology fields, including cybersecurity, data engineering, DevOps, QA, and software development.
