CHALLENGES

Following the departure of a key client, the organization seized the opportunity to rebuild and diversify its team, marking a pivotal moment for redefining its engineering direction and product strategy

GOAL

Recruit specialized back-end developers and DevOps professionals with security clearances from across the country, representing a diverse range of backgrounds, to enhance the diversity of the team

LaSalle Network successfully sourced candidates from across the country, presenting a diverse pool of highly specialized candidates. Our client valued the quality and diversity of the professionals we provided. Our proven track record of delivering results Tech the past further solidified their trust in us to meet their needs once again.
