Direct Hire

Technology: Cybersecurity

A leading healthcare organization serving over 26,000 patients across 32 states through more than 400 facilities, providing in-center and home dialysis services.

GOAL

Implement specialized technology talent to enhance the capabilities of the cybersecurity team.

CHALLENGES

- Identify robust talent to support Chief Information Security Officer.
- Ensure candidates had a background in healthcare, while also displaying a history of technical experience.

OUTCOME

We were in competition with another firm to fill the cybersecurity roles within the organization. Due to our superior communication, customer service and candidate quality, the company chose LaSalle for the exclusive partnership. We successfully filled five crucial roles, which support the Chief Information Security Officer. Due to this success, the client has enlisted our services to further expand the technology team through additional assignments.
